CONSTRUCTION UPDATE Sewer Project M, Phase 1

We want to give you an update on the construction in your neighborhood so you know what's happening and what you can expect over the next several months.

The city's contractor, Interwest Construction, has completed construction of the stormwater system and will begin replacing sewer lines in alleys in mid-November (see map on back). Two crews will work simultaneously: one going north of 15th Street, the other going south of 15th Street.

Installation of the sewer lines is expected to be completed by February 2016. Interwest Construction will distribute notices to affected residents with information about alley closures, parking restrictions and other issues. If you have questions or special needs, contact Interwest: Chris Johnson at 360-333-2397 or Roy Swihart at roys@interwest.biz.

Restoration of Grand Avenue is now complete. Many remaining streets have been patched pending the sewer work. Once that is complete and weather conditions are favorable, final paving of those streets will occur and alleys will be paved, full-width. In the meantime, sidewalk, curb and yard restoration will occur on an ongoing basis.

Thank you for your patience and cooperation during this project. More information is available on the city's website at <https://everettwa.gov/377/Sewer-System-Improvements-M-Project>.
